I am a dedicated software engineer eager to work together with clients and put my knowledge and skills to use and give value to my clients. I am ambitious, and I stay focused on the task at hand. I am passionate about fullstack development. I am looking to work with others where I can thrive on challenges, deepen my knowledge of software engineering, and create successful business relationships.

## Skills

## Languages

Native: Hungarian, English  
Learning: Chinese

## Hobbies

Snowboard

Gym

Coding

## Education

**MSc in Software Engineering** Sep 2016 - Jun 2018  
[University of Southern Denmark Odense](https://www.southern-denmark.dk/en/education/graduate-programmes/masters-programmes/masters-programme-software-engineering)

Odense, DK

As a software engineer, I have gained knowledge on developing intelligent solutions on numerous platforms.

### Data-based Generation of Reliability Models

Developing an automated method of extracting a fault tree representation of a system from time series data.

**BSc in Electrical Engineering** Sep 2012 - Jun 2016  
[Budapest University of Technology and Economics](https://www.bme.hu/en)

Budapest, HU

As an electrical engineer specializing in embedded systems, I have gained experience in developing software on embedded devices and control systems.

### Testing of AUTOSAR I-PDU Multiplexer

Unit testing of a basic software module called I-PDU Multiplexer in the AUTOSAR, a standardized automotive software architecture, at ThyssenKrupp Presta Hungary.

## Experience

**Python Fullstack Developer** Oct 2019 - Current

[Morgan Stanley](https://morganstanley.com)

Budapest, HU

Development of internal infrastructure systems at a global financial services firm.

**IT Consultant**

Mar 2019 - May 2019

[Netcompany A/S](https://netcompany.a/s)

Copenhagen, DK

Development of internal social media website to sign-up for company-wide events and software component analysis at CPH Airport

**Junior Backend Developer**

Nov 2018 - Jan 2019

[Codeum A/S](https://codeum.a/s)

Copenhagen, DK

Developing online gaming platform in .NET Core at a company with a background in the global gaming industry,

## Internships and Part-time

**Software Engineer Intern**

Sep 2017 - Jun 2018

[Buildcode I/S](https://buildcode.i/s)

Odense, DK

Internship at a company in the construction industry. Developing automation and visualization tools.

**University Instructor**

Sep 2017 - Jun 2018

[University of Southern Denmark Odense](https://www.southern-denmark.dk/en/education/graduate-programmes/masters-programmes/masters-programme-software-engineering)

Odense, DK

Instructed lab exercises in Modeling and Simulation, Statistics, and Artificial Intelligence.

**Software Developer**

Mar 2016 - Jun 2016

[Demola Budapest](https://demola.com/budapest)

Budapest, HU

Developed an Arduino prototype device for a Siemens initiated project through the Demola organization.

**Software Developer Intern**

Jul 2015 - Dec 2015

[ThyssenKrupp Presta Hungary](https://thyssenkrupp-presta.com)

Budapest, HU

Internship at an automotive industry company. Unit testing an AUTOSAR software module.
